

## **TriGeo Named a Finalist for Best Security Information/Event Management Solution by *SC Magazine***

### ***Industry Nod Marks Fifth Consecutive Finalist Ranking for Best Security Information/Event Management Solution***

**POST FALLS, Idaho (Dec. 11, 2009)** — [TriGeo Network Security](#), the leading provider of [security information and event management](#) (SIEM) technology for midmarket enterprises, was just named a finalist for the [Best Security Information/Event Management \(SIM/SEM\)](#) Solution in the prestigious 2010 SC Awards. This marks the fifth consecutive year that TriGeo has received finalist honors in the Best Security Information/Event Management category and the company's [seventh industry recognition](#) in 2009.

"TriGeo Network Security is among today's most respected security organizations," said *SC Magazine* editor-in-chief Illena Armstrong. "Security is a key challenge for businesses of all sizes and our readers recognize that companies like TriGeo are constantly developing new ways to safeguard networks and streamline compliance beyond the core capabilities of traditional technology."

[TriGeo SIM](#) goes far beyond simple log management, providing [real-time log analysis](#) to identify network attacks and policy violations as they happen and initiate proactive responses such as quarantining, blocking, and [USB device defense](#). The solution supports hundreds of network devices, comes stocked with more than 650 security and network monitoring rules, and nearly 300 pre-built reports for compliance and network analysis. TriGeo SIM is delivered as a fully configured appliance and is available at a price starting below \$20,000. TriGeo has hundreds of customers across financial services, retail, healthcare, education, government, utility and media/entertainment.

"In the evolving threat landscape, a breach notification ten minutes after-the-fact, is ten minutes too late – especially in the midmarket where seconds count," said Michelle Dickman, president and CEO of TriGeo Network Security. "Mid-tier organizations need solutions that act – not watch – to help them prevent unauthorized access to critical data and safeguard their organization from internal and external threats."

TriGeo was selected from more than 600 entries submitted in more than 31 technology categories. All finalists will be reviewed and winners will be chosen by the Reader Trust Voting Panel – comprised of security and technology experts from large, medium and small enterprises in all major vertical markets.

### **About TriGeo Network Security**

TriGeo Network Security delivers enterprise security information and event management (SIEM) designed specifically for the needs of the midmarket. TriGeo SIM is the only real-time SIEM appliance that automatically identifies and responds to network attacks, suspicious behavior and policy violations. This award-winning product combines real-time log management, event correlation, USB detection and prevention with powerful active response technology. TriGeo SIM is both a unique network defense technology and an "Audit-Proven" compliance solution that meets the security monitoring and log management requirements imposed by PCI, GLBA, NCUA, FDIC, HIPAA, SOX and more.

TriGeo has hundreds of customers across key vertical markets including financial services, healthcare, government, utility, retail and media/entertainment. TriGeo SIM has won numerous awards including the 2007 and 2008 *SC Magazine* Reader Trust Award, 2007 Frost & Sullivan North American Technology Innovation of the Year Award, the *Bank Technology News* #1 ranking in the 2008 FutureNow List, and the *SC Magazine Best Buy* of 2006 award for Event Management. The Company is a member of the PCI Security Standards Council and PCI Security Vendor Alliance and is represented by partners worldwide.
