## **TRIGEO SECURITY INFORMATION MANAGER EARNS 5-STAR RATING AND AN “EDITOR’S CHOICE AWARD” FROM *SECURITY WEEK MAGAZINE***

*TriGeo SIM Earns High Marks for Performance and Functionality*

**POST FALLS, ID, September 12, 2006** – TriGeo Network Security, a leading provider of security information management (SIM) solutions, today announced that *Security Week Magazine*, a Possibility Media publication, has awarded TriGeo’s SIM solution with a 2006 Editor’s Choice Award. *Security Week* awarded the TriGeo Security Information Manager a 5-star rating – its highest score – for a product review published in the magazine’s August 28 issue.

The TriGeo SIM solution was designed for mid-market enterprises to effectively monitor and manage activity inside the organization’s network. It provides reporting and analysis that supports the organization’s IT security, audit and compliance functions and provides real-time security incident analysis and response. The TriGeo SIM is ideal for IT security personnel who must respond quickly to both internal and external threats.

“TriGeo’s SIM appliance constantly monitors all devices on the network so completely and effectively that even smaller enterprises that lack a dedicated network security staff can rely on TriGeo to resolve serious security events as they happen,” said Ken Durham, editor-in-chief, *Security Week*. “Quite simply, this product is like adding a digital watchdog to your network. Nothing gets past it and it is a critical tool for any company involved in a security audit.”

“We are delighted to have earned such a high rating from the product review and the Editor’s Choice award from *Security Week*,” said Michelle Dickman, president and CEO, TriGeo Network Security. “We believe our product provides the industry’s best Security Information Management solution for mid-

market customers. We are especially pleased that the editors recommend the automated-response capabilities which clearly separate our SIM solution from the competition.”

The review cites TriGeo’s automated-response capabilities and its active defense of an organization’s network via multiple and targeted correlation rules, behavior analysis and network infrastructure integration. TriGeo works with hundreds of common networking hardware and software products, including anti-virus, firewalls, intrusion detection systems, multi-protocol routers, switches, as well as operating systems such as Windows, Linux, Unix, OS400, AIX and Novell.

### **About TriGeo Network Security**

Formed in 2001 as the pioneer and leader of Automated Remediation through Intelligent Correlation™, TriGeo protects the entire network – from perimeter to endpoint. With more than 40,000 nodes deployed, TriGeo Network Security is the leading provider of information and event management technology for mid-market enterprises.

The TriGeo Security Information Manager is the only network security appliance that automatically identifies, notifies and responds to network attacks, suspicious behavior and policy violations. With patent-pending technology for real-time log analysis, event correlation, automatic alerts and policy-based active response, TriGeo provides an innovative network defense technology through a complete security information management (SIM) solution.

TriGeo is privately-held with headquarters in Post Falls, Idaho. For more information, visit the company’s website at [www.trigeo.com](http://www.trigeo.com) or call (208) 664-7000
